Final-Year-Project 2018-2020 (Fashion Items Recommendation Android App)

This project aims to develop an Chatbot with Fashion Items Recommendation android app for customers. The Chatbot can find customers want fashion item. It can depend on their body information to recommend fashion item. Also, there are other different fashion functions. Such as list all item, fashion Chatbot, Virtual fitting room, fashion image recognition, etc.

Skill: Android Studio, Java, firebase, SQLITE, DialogFlow

Final-Year-Project 2016-2018 (AI Motion Analysis System)

My final year project is a deep learning project to develop AI Motion Analysis System. The system is mainly forced on retail industry because the retail industry is too hard to get client's opinion. The objective is recording customer emotion, age range, gender and flow of people. The system is using google TensorFlow and OpenCV to analyze the customer.

Work Experience
